JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

Nicaraguan, from Liverpool, West Indies, South America, with 1 Colombian immigrant.

Respectfully,

F. E. TROTTER,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Report of immigrants inspected at the port of Cienfuegos, Cuba, during the month of December, 1900.

Total number of immigrants inspected, 16; number passed, 16; number certified for deportation on account of dangerous contagious or loathsome diseases, or for other physical causes, none.

F. E. TROTTER,
Assistant Surgeon, U. S. M. H. S.

Report from Havana.

HAVANA, CUBA, January 7, 1901.

SIR: I have the honor to submit the following report for the week ended January 5, 1901:

The past week has been notable for the peculiar climatic variations which have been displayed. During the first four days it was uncomfortably warm in doors and out. The atmosphere gave a feeling of depression. On the 5th it began to rain, and so terrific was the down-pour that within a few hours all of the business streets were flooded a foot above the sidewalks, even entering some of the houses. It was a heavier rainfall than any during the past rainy season.

There has been no marked change in the yellow fever situation. Five deaths are recorded, an increase of 2 over the previous week.

The passenger transfer boat *Tarpon*, belonging to the Plant Steamship Line, was thoroughly disinfected under my personal supervision on the 5th instant and cleared for Key West, Fla. The vessel is to make the run between Miami and Key West.

The disinfecting barge *Sanator*, since the removal of quarantine, has been practically placed out of commission. Much of the force has been reduced. She is held in readiness, however, to disinfect any vessel should such treatment be required. She will receive a general overhauling and be placed in readiness for the next season.

The work in the other departments of this station continues heavy. On the 31st, the time of boarding officers was wholly taken up. Twelve vessels were inspected and entered port and 8 were cleared and given bills of health. There were inspected during the week 3,122 men, crews of vessels arriving and departing, and 1,207 immigrants. Seven hundred and seventy-six passengers applied to this office and were given health certificates.

On January 3, P. A. Surg. G. M. Guitéras reported a case of yellow fever at the port of Matanzas, and on the same day Asst. Surg. F. E. Trotter reported 1 case of yellow fever at Cienfuegos.

I inclose the usual mortality table for the week.

Respectfully,

A. H. GLENNAN,
Surgeon, U. S. M. H. S.,

Chief Quarantine Officer for the Island of Cuba.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.
